

### Description

Syringa Networks' Private Line service is layered on our SONET Network covering southern Idaho. Syringa Networks is the only alternative provider offering Private Line services between the majority of southern Idaho's cities and towns.

We offer secure, protected Private Line connectivity for carriers and corporations. The service is designed to transmit digital signals at speeds from DS1 to OC48. This end-to-end service includes coordination of the local loop on behalf of the customer.

### Features and Benefits

Syringa Networks is owned by 12 Idaho local exchange carriers. We are intimately familiar with provisioning circuits in Idaho; in fact, it's all we do.

**We know Idaho networking.**

## Private Line Service

### Service

- Focused on creating Idaho-only networks, with connections to the rest of the world
- 7x24 support
- Intimately familiar with provisioning services in small towns and metropolitan Idaho cities

### Flat-rate pricing

- Unlimited usage pricing per DS0 mile
- Multiyear term and revenue commitment discounts

### Reliability

- SONET-based network reliability
- Auto-restorability
- Provisioned as a point-to-point, private line network
- 24x7x365 availability of dedicated bandwidth
- 1+1 (protected) circuits allows for route-restorable diversity

### Customer premises equipment (CPE) agnostic

- Works with existing hardware
- Supports voice, data, and multimedia applications

### Scalability

- DS1 – OC48 services available

### Security and low latency

- Private, secure networking, not a shared service (such as Frame Relay or ATM)
- Guaranteed maximum throughput for all mission critical applications

### Functionality

- Network multiple private line solutions together
- Easy to provision and install

### Migration

- Reuse existing customer equipment
- Simple cut over process

### Price

- Flat rate pricing, regardless of usage
- Expenses predictable and manageable
- Flat rate billing is simple, predictable and accurate
