

IT Managed Services & Security

Syringa Networks Managed IT Services are designed to ensure companies are utilizing the right technology for their needs, proactively monitoring threats, and securing their data. Our team of IT experts specialize in security, network, firewall, and application management for less the cost of maintaining a team of in-house experts. Our seasoned professionals are responsive and can be reached any time for support.

Service Benefits

Security & Compliance

Our skilled security team utilizes the most advanced tools paired with multi-factor authentication to keep your data safe.

Disaster Recovery

We provide multiple backups of your data in geographically diverse colocation facilities to ensure you never lose any of it.

Customized Solution

Our extensive knowledge of hardware, software, licensing, and security is used to create a customized solution for your business needs.

Proactive Monitoring

We provide 24/7 monitoring of your network and can detect problems before they disrupt your business.

Security & Software Updates

We manage all of your maintenance updates to ensure your systems operate at optimal performance.

Staff Augmentation

We remove the burden of managing your technology resources by leveraging our expertise in the industry to provide a customized solution that's tailored to your team and network requirements.

Customer Support

Our team of IT professionals is based in the U.S. and accessible around the clock.
