

Internet for Your Business

Telecommunications systems are an important factor for your business. The need for capacity and access has traditionally been driven by voice requirements with Internet access being a secondary element. Today there is a fundamental shift as businesses leverage the benefits of cloud-based services, collaborative environment, Voice over IP, and other Internet-based solutions - all of which increase a company's need for reliable, high bandwidth Internet access.

Syringa Networks Business Internet Access service is delivered over our purpose-built, self-healing fiber optic network in a variety of configurations using Ethernet and DWDM Wave Technologies.

The Backbone of Your Business is Connectivity

Redundant Connectivity:

Syringa Networks utilizes multiple geographically-diverse Tier 1 transit and peering connections which creates a highly available and reliable service.

Internet Peering:

We directly peer with over 250 content and cloud providers, search engines and regional networks at multiple Tier 1 Internet Exchange Points (IXPs)

Carrier Class Routing:

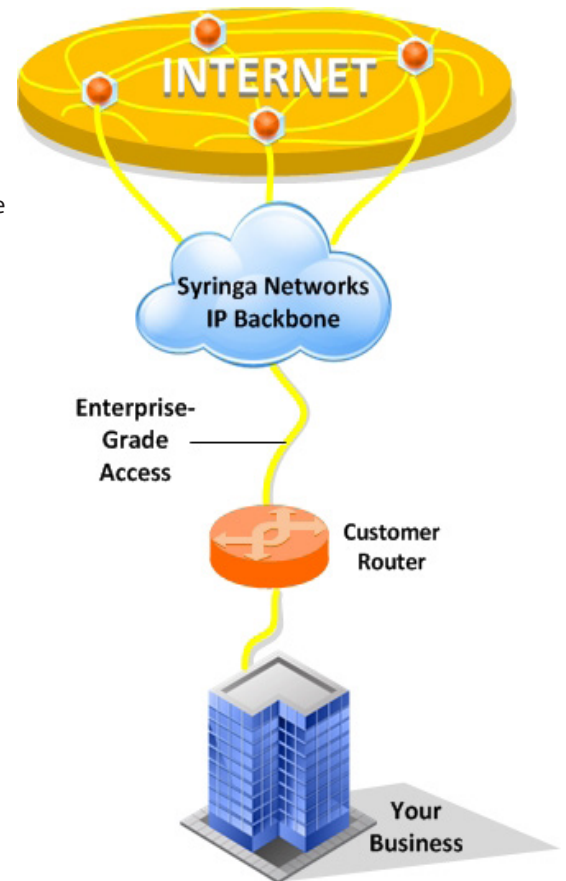

Syringa Networks IP network is built upon carrier-class BGP routing infrastructure from Cisco Systems, the foremost provider of next-generation IP core routers.

IPv6 Support:

Syringa Networks is an early adopter in the deployment and support of IPv6 networking and we provide a native dual stack (IPv4 and IPv6) service over our MPLS label switched core network.

Network Capacity:

Our continuously upgraded network and careful capacity planning ensures that our network has sufficient capacity to handle all of your bandwidth demands.

Business Internet Access Overview

- Bandwidth: 10 Mbps to 100 Gbps per port
- Port Interfaces: FastE, 1G, 10G, 100G, DS1-OC192
- Advanced BGP routing (ASN 15305) or standard static routing
- Native dual stack (IPv4 and IPv6) service
- Multi-homed, geo-diverse IP architecture
- High performance DNS resolution
- 24 hour network monitoring
- 24x7x365 Network Surveillance Center

Reliable and Scalable

Syringa Networks IP Backbone

Syringa Networks Business Internet Access service provides your company with a reliable and scalable connection to the Internet improving your ability to leverage online applications and to operate more cost effectively. With enterprise-grade Internet service, you can enjoy the cost saving of VoIP, utilize online sales automation, implement collaboration software across multiple sites and leveraging video conferencing solutions - all without performance concerns associated with traditional best effort Internet access.

Unmatched Service

Syringa Networks provides your business with more than a connection to the Internet - we are a trusted partner that works with you to develop a customized solution to meet the needs of your business. We provide your business with the added security of a 24x7 Network Surveillance Center.
