

## The Benefits of SIP Solutions

Syringa Networks SIP Solution offers a custom voice service that increases productivity and will integrate well with your existing communications network.

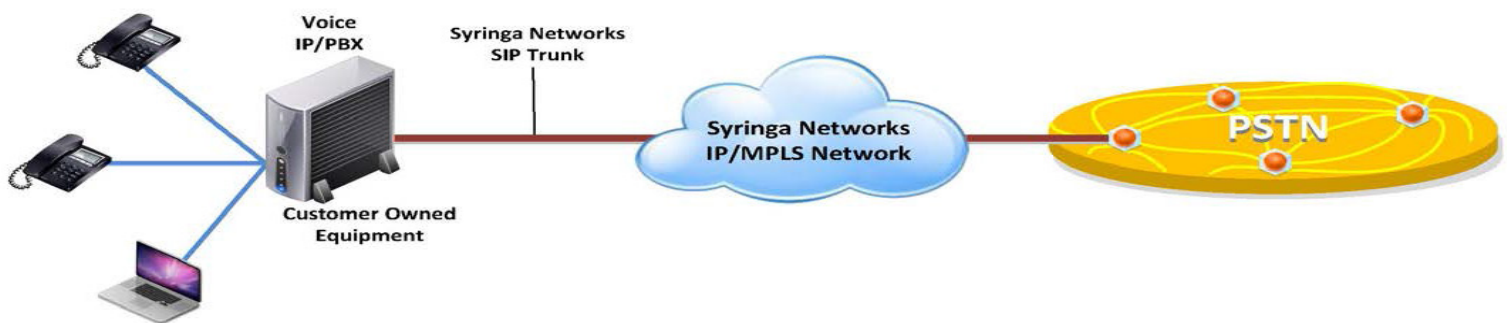

Delivered on a dynamic and robust network, SIP Trunking provides a scalable, flexible, and cost effective alternative to traditional voice services.

The SIP Trunking product also saves businesses time through easy flat rate billing for local, long-distance, and toll-free calling packages. No more complicated per minute invoices to review every month.

Customers will also enjoy reliability of SIP Trunking because it is delivered on Syringa Networks high-speed managed network. In addition, the switching platform is state of the art and will work with most standards-based PBX equipment. Service Level Agreements apply to SIP Trunking and expert support is available 24x7x365.
